HAGS

HAGS ORBIT **- A ROUNDABOUT WITH EXTRA SPIN.**

The HAGS Orbit is a robust and stylish solitaire, designed for fun social interaction. It has a fixed centre with a ring around it. The ring is used to increase the speed in the joined task of trying to spin as fast as the users dare.

Rotates in an angle.

To achieve that extra sensation of tingling, the roundabout rotates in a slight angle. The brave user leans back to increase the excitement further. The Orbit's design inspires you to try to sit in different ways and even to stand and balance on the ring. There is a red mark on the centre top that can be used as a tachometer or in the game "don't end up at the red mark" when Orbit stops.

For park or urban environments.

The dimensions of the Orbit are so generous that many can spin together. It can be placed on playgrounds, but also as a standalone play sculpture, e.g. in a square.

HAGS is a global company with a product offering that stretches over an extensive range - for play, sports and other outdoor recreation - designed for people of all ages.

For a complete presentation of the range, visit www.hags.com.
