

PRESS RELEASE
31-05-2010

TIME TO SWITCH TYRES

It is time to switch tyres - at the play ground. New rules makes it impossible to use the classic tyre seats at European play grounds. HAGS, being one of the leading producers of play equipment, has because of this developed the new swing seat, Reddy. Reddy now replaces the tyre seat. It has been shown that rubber tyres contain high aromatic oils that can be hazardous to you health. Hence the German organization TÜV who certifies play equipment in accordance with the European standard, recommend that tyres should no longer be used as swing seats.

- Our new swing seat Reddy give more space and more comfort to the children than the swing tyres did, says Bo Göransson, product manager at HAGS. It has a completely new modern shape and it is construed for long durability and is easy top replace if vandalized. The seat has been developed in close cooperation with TÜV and is thoroughly tested to meet the valid standards for play equipment.

For more info please contact:
